## The rape of the earth

### Reference Number

22

### Text

Let's continue raping the Earth until there is nothing left. Seems like a nice idea, doesn't it? Especially here, at the doorstep of our town, where everyone goes to fish and hike and relax. Look what Malartic looks like now! Does the place and water will look exactly like what it looks like right now? The quest for more wealth will not fill the holes in your souls... neither the big one you'll create in the landscape. No thanks for that project.
